

**3,800+ cases of congenital syphilis in 2023.  
279 related neonatal or infant deaths.<sup>1</sup>**

*The highest numbers in **30 years.***

**Early screening and treatment during  
pregnancy can save lives.**

## Protect Mothers & Babies: 10-Minute Syphilis Screening

Syphilis Health Check™ is the only CLIA-waived, FDA-cleared rapid syphilis test that detects both IgM and IgG antibodies—providing a more complete screening tool for syphilis throughout pregnancy.

- > **10-minute results** – fast detection & same-day treatment for improved prenatal care
- > **98% sensitivity & 97.2% specificity** – highly accurate at all stages of infection
- > **No lab required** – a simple fingerstick in the clinic is all it takes
- > **FDA-cleared** – trusted by providers for over a decade

**Proven impact:** The Preg-OUT program has demonstrated that integrating rapid testing into maternal health programs increases syphilis screening rates, improves early detection, and accelerates treatment—key steps in preventing congenital syphilis.

**Nearly 90% of newborn syphilis cases could be prevented with timely testing and treatment.<sup>2</sup>**

Let's work together to eliminate congenital syphilis. Join Diagnostics Direct in partnering for impact – because every baby deserves a healthy start.
